

WHAT SETS US APART FROM OTHERS?

PRECISE | EXHAUSTIVE | TIMELY | INSIGHT

uMax Data Technology Limited is formed by a group of professionals from Hong Kong, Taiwan, Macao and Singapore who specialized in Internet research, big data technology, data mining and data analysis consultancy. The team affiliates with ERS e-Research & Solutions, a Macao-based research and data mining company.

Based on our **DATA IN VALUE OUT** principle, the platform we built to tackle public opinion monitoring and analysis can filter large amount of irrelevant data, allows users to capture the useful information to facilitate their decision-making. The cutting-edge technology deployed by the platform offers users a handy way to do both real time monitoring and in-depth analysis capacity including report generating. Handling non-textual media source is one of our strengths, which definitely will help our users to meet the challenges of the digital media ecology today.
